

ABIJAY AP

Python Developer | Data Science Enthusiast

✉ abijayap50@gmail.com ☎ 7356741669 📍 Bangalore, Karnataka 🔗 [linkedin.com/in/abijay-ap-2004](https://www.linkedin.com/in/abijay-ap-2004)

PROFILE

Aspiring Backend Developer with strong proficiency in Python, Django, and SQL, focused on building scalable server-side applications and RESTful APIs. Experienced in data processing, backend logic implementation, and database integration. Familiar with Django ORM, authentication systems, and version control using Git. Seeking Software Engineer / Backend Developer roles.

EDUCATION

B-Tech Artificial Intelligence and Data Science, <i>JCT College of Engineering and Technology Anna University</i>	09/2022 – Present Pichanur, Tamil Nadu
Higher Secondary Education, GHSS Mankara	06/2020 – 05/2022 Palakkad, Kerala
SSLC, Seva Sadan Central School	04/2020 Palakkad, Kerala

TECHNICAL SKILLS

Programming Language

- Python
- SQL

Backend Development

- Django
- REST API Operations
- CRUD Operations

AI & Data Science

Machine Learning (Basics), Deep Learning (CNN, YOLO)

Tools & Platforms

- Git
- Jupyter Notebook

Software Development Concepts

- Object-Oriented Programming (OOP)
- Data Structures & Algorithms (Basics)
- Debugging & Code Optimization

PROJECTS

Car Damage Detection & Severity Classification (Hybrid CNN-YOLO)

- Developed a computer vision system using YOLOv8 and CNN for vehicle damage detection, localization, and classification
- Applied deep learning, object detection, and image processing techniques for real-time analysis
- Trained on 8K+ annotated images with data augmentation and preprocessing
- Evaluated using mAP, Precision, Recall, IoU metrics; achieved ~99% precision

Fraud Detection System (Python)

- Developed a Python-based system to detect suspicious email activities using rule-based logic and anomaly detection
- Processed and cleaned datasets using Pandas for structured analysis
- Simulated detection of phishing, spoofing, and account takeover scenarios
- Modularized code for scalability and maintainability

Data Processing Automation Tool (Python)

- Built a Python script to automate data cleaning and file processing tasks
- Used file handling and Pandas to process large datasets

- Reduced manual effort and improved efficiency

CERTIFICATES

Tools of the Trade: Linux and SQL

- Issuing Organization: Google
- Skills Gained: SQL, Linux CLI, Cloud VM usage

Tata Data Visualisation: Empowering Business with Effective Insights Job Simulation

- Created data visualizations for Tata Consultancy Services
- Created visuals for data analysis to help executives with effective decision making
